Glen Rock, NJ 07452

EDUCATION

Kent State University

B.B.A. Finance

June 2010 – Dec. 2012

General Assembly

Certificate: Web Development Immersive

June 2018 – Sept. 2018

EMPLOYMENT

Zoom — Software Engineer

United States

May 2022 – Present

- [TODO: Add accomplishment bullet — describe features shipped, scope, or impact]
- [TODO: Add accomplishment bullet — tech stack, team collaboration, or ownership]
- [TODO: Add accomplishment bullet — metrics, launch outcomes, or cross-team work]

Solvvy — Senior Solutions Engineer

Remote

Jan. 2022 – May 2022

Acquired by Zoom

- [TODO: Add accomplishment bullet — solutions delivered or customer outcomes]
- [TODO: Add accomplishment bullet — acquisition transition or technical enablement]

WalkMe — Senior Solutions Engineer

New York, NY

Jan. 2021 – Jan. 2022

- Led post-sale solution design and implementation for enterprise clients in partnership with Project Managers, delivering production WalkMe experiences across complex SaaS environments
- Analyzed user engagement metrics across delivered solutions and iterated on content strategy to drive adoption and sustained product usage
- Conducted Q&A, onsite, and screen-share training sessions; advised stakeholders on process improvements that strengthened platform performance

WalkMe — Solutions Engineer

New York, NY

Mar. 2019 – Jan. 2021

- Partnered with Sales and Account Managers to build proofs of concept and provide technical support that demonstrated clear ROI for prospective and existing accounts
- Successfully implemented WalkMe solutions for 10+ enterprise accounts, including PepsiCo, Monsanto, and Fidelity

SKILLS

Programming: TypeScript, JavaScript, Node.js, React, Next.js, GraphQL, Fastify, Apollo Server, Prisma ORM, MongoDB, SQL, HTML/CSS, RESTful APIs, Turborepo, Vitest, Tailwind CSS, Git, Unix/Bash

PROJECTS

HassenCo — Full-Stack E-Commerce Platform

2025 – Present

github.com/shassen/hassenco

Designed and built HassenCo, a production-grade e-commerce platform for a premium handmade leather goods brand.

Architected a TypeScript monorepo (Turborepo) with a Fastify/Apollo/TypeGraphQL API, Next.js 16 storefront, and MongoDB/Prisma data layer. Implemented JWT authentication with role-based access control, anonymous-to-authenticated cart merging, GraphQL Codegen for end-to-end type safety, admin product/order management with image upload, and a Vitest test suite with GitHub Actions CI.

- Built end-to-end type safety from Prisma schema through TypeGraphQL to GraphQL Codegen—generated typed React Apollo hooks
- Implemented session-based anonymous carts with server-side merge into authenticated user carts on login
- Hardened the GraphQL API with IP rate limiting, CORS, and structured Pino logging with per-request IDs
- Delivered an admin dashboard for product, category, and order CRUD with JWT-protected image upload
- Wrote ~2,000 lines of Vitest unit tests across seven service modules and wired CI via GitHub Actions

Tech: TypeScript, Next.js 16, React 19, GraphQL, Fastify, Apollo Server, TypeGraphQL, Prisma, MongoDB, Turborepo, Tailwind CSS 4, Vitest, GitHub Actions, JWT/RBAC
